

Project Presentation/Demonstration

[Start Assignment](#)

- Due 23 May by 23:59
- Points 8
- Submitting a file upload
- Attempts 0
- Allowed attempts 2
- Available 2 Mar at 0:00 - 26 May at 23:59

Due date: 23 May 2026, 23:59 (submit your presentation slides before the day of your workshop **on-campus only**)

Mark Allocated: 8% of your final mark

Project Presentation: Before you present your work, the team must present all levels of attempt. Work on the tasks sequentially keeping a screen of every sub-task you perform to complete the tasks at every level for project report submission. The assessment is due in week 11 and you will be presenting your work in your respective tutorial workshops.

For the presentation, you can support your work with some presentation slides (4-8 slides). Slides could talk about the selected tools, problems faced and how they were resolved, and code demonstration of the deployed project. The presentation will be 15 minutes long followed by Q&A.

The final presentation/Demonstration is held at your lab sessions please make sure your team should be present. During this time, your group has the opportunity to present your learning experiences on the project. You can gain feedback on the design solution and programming. Your group will have about 15 minutes to present your recommended solution to the Academic Panel. Use the Swinburne template.

Make sure your group covers (4-8 slides) the following:

- Project background
 - Project scope/deliverables
- Preliminary design concept(s), including how these address the problem
 - Design and Development
- Compatibility of Design
 - Satisfy the design requirements
- **Code demonstration**

Allocated time

- Presentation: Strictly 15 minutes per group; your group will be given a time warning with two minutes to go, then one minute to go. Your group will be cut-off at 15 minutes. As a guide, the presentation of slides takes 1-3 minutes each.
- Comments, questions and answers: Strictly 5 minutes per group.
- Use the **presentation template** (<https://swinburnesarawak.instructure.com/courses/2068/files/1426553?wrap=1>)

We also respectfully acknowledge Swinburne's Aboriginal and Torres Strait Islander staff, students, alumni, partners and visitors.

We also acknowledge and respect the Traditional Owners of lands across Australia, their Elders, Ancestors, cultures, and heritage, and recognise the continuing sovereignties of all Aboriginal and Torres Strait Islander Nations.

Overview

Submission requirements

- Only one group member is required to submit the presentation to Canvas on behalf of the group.
- If you are using PowerPoint, submit the file with the following filename format: Sem_Presentation_Group Name.PPT(X)
- Substitute GroupName with your group name, e.g., if your group is named Engg Cons, then the filename should be Sem_Presentation of Technical Solution _Engg Cons.pdf. Submit through Canvas.
- The **due date for submission is 23 May 23:59**.

Evaluation of Presentation

The presentation will be evaluated against the quality, consultation, technical feasibility and compatibility design. This is a **teamwork assessment**, **individual assessment** will be **not be accepted**. make sure you are part of a team allocated from your lab session.

Final presentation

Criteria	Ratings					Pts
Quality. Ability to communicate effectively throughout the presentation and engage the audience, Ability to answer the questions	2 Pts Advanced Presentation was clear and thoroughly prepared. Speech is clear, audible and engaging.	1.5 Pts Proficient Presentation was clear and soundly prepared. Speech is mostly clear and audible.	1 Pts Developing The presentation was limited in clarity and preparation. Speech is often inaudible.	0.5 Pts Pass The presentation was limited in clarity and preparation. Speech is often unclear or inaudible.	0 Pts No evidence Presentation is not addressed clearly to the audience	2 pts
Consultation – Background of project and problem statement	1 Pts Advanced Demonstrates the ability to construct a clear and insightful project background with evidence of all relevant contextual factors.	0.75 Pts Proficient Begins to demonstrate the ability to construct a project background with evidence of the most relevant contextual factors, but the project overview is superficial.	0.5 Pts Developing Demonstrate the ability to construct a project background with little evidence of the most relevant contextual factors with an unclear project overview.	0.25 Pts Pass Demonstrate the ability to construct a project background with no evidence of the most relevant contextual factors with an unclear project overview.	0 Pts No evidence Fails to describe project	1 pts
Compatibility of Design	2 Pts Advanced A comprehensive description of design Solutions. The excellent rationale for design solutions with virtual architecture, design, with excellent relationship to stakeholder requirements.	1.5 Pts Proficient A good description of design Solutions and a brief rationale for design solutions with virtual architecture, and design, with relationship to stakeholder requirements.	1 Pts Developing A brief description of design Solutions with few relationships to stakeholder requirements. There are few Conflicts between project scope and deliverables.	0.5 Pts Pass A brief description of design Solutions with fewer relationships to stakeholder requirements. There are more Conflicts between project scope and deliverables.	0 Pts No evidence Description of design Solutions is missing with little or no consideration of the project scope.	2 pts
Source Design/Coding and a brief explanation	3 Pts Advanced An ability to provide deployment outcomes successfully with a brief explanation of design/coding/scripts, and presented clear images/pasted console.	2 Pts Proficient An ability to provide deployment outcomes successfully with design/coding/scripts, and presented images/pasted console.	1.5 Pts Developing An ability to provide deployment outcomes successfully with few errors in design/coding/scripts, and presented with images/pasted console.	1 Pts Pass An ability to provide deployment outcomes successfully with more errors in design/coding/scripts, and presented with images/pasted console.	0 Pts No evidence Deployment outcomes are missing with design/coding/scripts	3 pts
Total points: 8
